Index to Volume 73, 1989

Airborne bacteria and viruses: C.S. Cox, 469
Air filtration: protection against respirable dust: R.C. Brown, 413
Alcohol and alcohol abuse, the biochemistry of: T. Norman Palmer, 1
Anaerobic degradation of hydrocarbons: J.C. Bertrand, P. Caumette, G. Mille, M. Gilewicz and M. Denis, 333
Ansari, S.A., Khan, F.A. and Khan, N.A.: Nitrogenase: a delicate complex system, 287
Arthritis, chronic, pathogenesis and treatment of: E.R. Pettipher, 521
Bacterial epibionts of copepods: S. Nagasawa, 169
Beards, G.M. see Flewett, T.H.
Berks, M.: Cellular signalling during *Dictyostelium* morphogenesis, 17
Bertrand, J.C., Caumette, P., Mille, G., Gilewicz, M. and Denis, M.: Anaerobic biodegradation of hydrocarbons, 333
Blaustein, A.R. see Porter, R.H.
Bremner, J.G.: Perceptual and intellectual development in infancy, 443
Brown, P.J.: Polarized neutron diffraction, 213
Brown, R.C.: Air filtration: protection against respirable dust, 413
Burnett, K. see Stacey, D.N.
Caumette, P. see Bertrand, J.C.,
Cellular signalling during *Dictyostelium* morphogenesis: M. Berks, 17
Chemical nitrogen fixation and transition metal dinitrogen complexes: G.J. Leigh, 389
Ciliary propulsion in protozoa: M.A. Sleigh, 317
Clarke, A.R. and Holbrook, J.J.: The rational construction of new enzymes: design and synthesis of a dehydrogenase which accepts an unnatural substrate, 117
Conway Morris, S.: Early metazoans, 81
Cosmological constant, the: F. Mellor, 429
Cox, C.S.: Airborne bacteria and viruses, 469
Davidson, A. see Steinbiss, H-H.
Denis, M. see Bertrand, J.C.
Dictyostelium morphogenesis, cellular signalling during: M. Berks 17
Early metazoans: S. Conway Morris, 67
Electron microscopy defects in crystals: M.H. Loretto, 263
Environmental impact of North Sea oil, the: J.G. Bremner, 457
Flewett, T.H. and Beards, G.M.: Recent advances in the study of viral gastroenteritis, 33
Fundamental physical constants, the values of: B.W. Petley, 231
Gastroenteritis, recent advances in the study of: T.H. Flewett and G.M. Beards, 33
Genetic manipulation of plants: from tools to agronomical applications: H-H. Steinbiss and A. Davidson, 147
Gilewicz, M. see Bertrand, J.C.,
Gregory, R.D. and Keymer, A.E.: The ecology of host – parasite interactions, 67
High-resolution laser spectroscopy; D.N. Stacey and K. Burnett, 351
Holbrook, J.J.: see Clarke, A.R.
Host – parasite interactions, the ecology of: R.D. Gregory and A.E. Keymer, 67
Hypothermia and cold: E.L. Lloyd, 101
Infancy, perceptual and intellectual development in: J.G. Bremner, 443
Jones, A.M.: The environmental impact of North Sea oil: 457
Kanekar, S.: Towards a scientific understanding of romantic love, 501
Keymer, A.E. see Gregory, R.D.
Khan, F.A. see Ansari, S.A.
Khan, N.A. see Ansari, S.A.
Kin recognition, mechanisms and ecological correlates of: R.H. Porter and A.R. Blaustein, 53
Leigh, G.J.: Chemical nitrogen fixation and transition metal dinitrogen complexes, 389
Lloyd, E.L.: Hypothermia and cold, 101
Loretto, M.H.: Electron microscopy defects in crystals, 263
Magnetic resonance imaging, recent advances in: I.R. Young, 177
Mellor, F.: The cosmological constant, 429
Mille, G. see Bertrand, J.C.,

Nagasawa, S.: Bacterial epibionts of copepods, 169
New enzymes, the rational construction of: design and synthesis of a dehydrogenase which accepts an unnatural substrate: A.R. Clarke and J.J. Holbrook, 117
Nitrogenase: a delicate complex system: S.A. Ansari, F.A. Khan and N.A. Khan, 287
Norman Palmer, T.: The biochemistry of alcohol and alcohol abuse, 1
Olbers' paradox in astronomy: history, nature and resolution: P.S. Wesson, 133
Palmer, M.S.: Sex determining genes, 245
Perceptual and intellectual development in infancy: J.G. Bremner, 443
Petley, B.W.: The values of the fundamental physical constants, 231
Pettipher, E.R.: Pathogenesis and treatment of chronic arthritis, 521
Polarized neutron diffraction: P.J. Brown, 213
Porter, R.H. and Blaustein, A.R.: Mechanisms and ecological correlates of kin recognition, 53
Protozoa, ciliary propulsion in: M.A. Sleigh, 317
Respirable dust, protection against: R.C. Brown, 413
Romantic love, toward a scientific understanding of: S. Kanekar, 501
Sex determining genes: M.S. Palmer, 245
Sleigh, M.A.: Ciliary propulsion in protozoa, 317
Stacey, D.N. and Burnett, K.: High-resolution laser spectroscopy, 351
Steinbiss, H-H. and Davidson, A.: Genetic manipulation of plants: from tools to agronomical applications, 147
Transition metal dinitrogen complexes, Chemical nitrogen fixation and: G.J. Leigh, 389
Wesson, P.S.: Olbers' paradox in astronomy: history, nature and resolution, 133
Yellow rain in China: Zhang Zhongying, 301
Young, I.R.: Recent advances in magnetic resonance imaging, 177
Zhang Zhongying: Yellow rain in China, 301

Contents

Volume 73 Number 289 1989

T. Norman Palmer The biochemistry of alcohol and alcohol abuse 1
M. Berks Cellular signalling during *Dictyostelium* morphogenesis 17
T.H.Flewett and G.M. Beards Recent advances in the study of viral gastroenteritis 33
Richard H. Porter and Andrew R. Blaustein Mechanisms and ecological correlates of kin recognition 53
Richard D. Gregory and Anne K. Keymer The ecology of host–parasite interactions 67
S. Conway Morris Early metazoans 81
Evan L. Lloyd Hypothermia and cold 101
Anthony R. Clarke and J. John Holbrook The rational construction of new enzymes: design and synthesis of a dehydrogenase which accepts an unnatural substrate 117

Volume 73 Number 290 1989

P.S. Wesson Olbers' paradox in astronomy: history, nature and resolution 133
H-H. Steinbiss and A. Davidson Genetic manipulation of plants: from tools to agronomical applications 147
S. Nagasawa Bacterial epibionts of copepods 169
I.R. Young Recent advances in magnetic resonance imaging 177
P.J. Brown Polarized neutron diffraction 213
B.W. Petley The values of the fundamental physical constants 231
M. S. Palmer Sex determining genes 245

Volume 73 Number 291 1989

M.H. Loretto Electron microscopy defects in crystals 263
S.A. Ansari, F.A. Khan and N.A. Khan Nitrogenase: a delicate complex system 287
Zhang Zhongying Yellow rain in China 301
M.A. Sleigh Ciliary propulsion in protozoa 317
J.C. Bertrand, P. Caumette, G. Mille, M. Gilewicz and M. Denis Anaerobic biodegradation of hydrocarbons 333
D.N. Stacey and K. Burnett High-resolution laser spectroscopy of atoms 351
G.J. Leigh Chemical nitrogen fixation and transition metal dinitrogen complexes 389
R.C. Brown Air Filtration: protection against respirable dust 413

Volume 73 Number 292 1989

Felicity Mellor The cosmological constant 429
J.G. Bremner Perceptual and intellectual development in infancy 443
A.M. Jones The environmental impact of North Sea oil 457
C.S. Cox Airborne bacteria and viruses 469
Suresh Kanekar Toward a scientific understanding of romantic love 501
E.R. Pettipher Pathogenesis and treatment of chronic arthritis 521
